The Fortinet Enterprise Firewall Solution delivers end-to-end network security with one platform, one network security operating system and unified policy management with a single pane of glass — for the industry's best protection against the most advanced security threats and targeted attacks.

**Security Fabric Integration**
FortiGate appliances, interconnected with the Fortinet Security Fabric, form the backbone of the Fortinet Enterprise Solution.

**Deployment Modes**
- Next Generation Firewall
- Internal Segmentation Firewall

**Hardware Acceleration**
- SPU NP6 and CP8

**16 Gbps**
- Firewall

**6 Million**
- Concurrent Sessions

**3.5 Gbps**
- IPS

**2.5 Gbps**
- NGFW

**2 Gbps**
- Threat Protection

Multiple GE RJ45 and GE SFP slots

**Third-Party Certifications**

DATA SHEET
HARDWARE

FortiGate 500D

Interfaces
1. Console Port (RJ45)
2. 2x USB Ports
3. 2x GE RJ45 Management Ports
4. 8x GE SFP Slots
5. 8x GE RJ45 Ports
6. FRPS Connector

Powered by SPU
- Custom SPU processors deliver the power you need to detect malicious content at multi-Gigabit speeds
- Other security technologies cannot protect against today’s wide range of content- and connection-based threats because they rely on general-purpose CPUs, causing a dangerous performance gap
- SPU processors provide the performance needed to block emerging threats, meet rigorous third-party certifications, and ensure that your network security solution does not become a network bottleneck

Network Processor
Fortinet’s new, breakthrough SPU NP6 network processor works inline with FortiOS functions delivering:
- Superior firewall performance for IPv4/IPv6, SCTP and multicast traffic with ultra-low latency down to 2 microseconds
- VPN, CAPWAP and IP tunnel acceleration
- Anomaly-based intrusion prevention, checksum offload and packet defragmentation
- Traffic shaping and priority queuing

Content Processor
The SPU CP8 content processor works outside of the direct flow of traffic, providing high-speed cryptography and content inspection services including:
- Signature-based content inspection acceleration
- Encryption and decryption offloading
SOFTWARE

FortiOS
Control all the security and networking capabilities across the entire FortiGate platform with one intuitive operating system. Reduce operating expenses and save time with a truly consolidated next generation security platform.

- A truly consolidated platform with one OS for all security and networking services for all FortiGate platforms.
- Industry-leading protection: NSS Labs Recommended, VB100, AV Comparatives and ICSA validated security and performance.
- Control thousands of applications, block the latest exploits, and filter web traffic based on millions of real-time URL ratings.
- Detect, contain and block advanced attacks automatically in minutes with integrated advanced threat protection framework.
- Solve your networking needs with extensive routing, switching, WiFi, LAN and WAN capabilities.
- Activate all the SPU-boosted capabilities you need on the fastest firewall platform available.

SERVICES

FortiGuard™ Security Services
FortiGuard Labs offers real-time intelligence on the threat landscape, delivering comprehensive security updates across the full range of Fortinet’s solutions. Comprised of security threat researchers, engineers, and forensic specialists, the team collaborates with the world’s leading threat monitoring organizations, other network and security vendors, as well as law enforcement agencies:

- **Real-time Updates** — 24x7x365 Global Operations research security intelligence, distributed via Fortinet Distributed Network to all Fortinet platforms.
- **Security Research** — FortiGuard Labs have discovered over 170 unique zero-day vulnerabilities to date, totaling millions of automated signature updates monthly.
- **Validated Security Intelligence** — Based on FortiGuard intelligence, Fortinet’s network security platform is tested and validated by the world’s leading third-party testing labs and customers globally.

FortiCare™ Support Services
Our FortiCare customer support team provides global technical support for all Fortinet products. With support staff in the Americas, Europe, Middle East and Asia, FortiCare offers services to meet the needs of enterprises of all sizes:

- **Enhanced Support** — For customers who need support during local business hours only.
- **Comprehensive Support** — For customers who need around-the-clock mission critical support, including advanced exchange hardware replacement.
- **Advanced Services** — For global or regional customers who need an assigned Technical Account Manager, enhanced service level agreements, extended software support, priority escalation, on-site visits and more.
- **Professional Services** — For customers with more complex security implementations that require architecture and design services, implementation and deployment services, operational services and more.

For more information, please refer to the FortiOS data sheet available at www.fortinet.com

Enterprise Bundle
FortiGuard Labs delivers a number of security intelligence services to augment the FortiGate firewall platform. You can easily optimize the protection capabilities of your FortiGate with the FortiGuard Enterprise Bundle. This bundle contains the full set of FortiGuard security services plus FortiCare service and support offering the most flexibility and broadest range of protection all in one package.

System Performance and Capacity

- IPv4 Firewall Throughput (1518 / 512 / 64 byte, UDP): 16 / 16 / 16 Gbps
- Firewall Latency (64 byte, UDP): 3 μs
- Firewall Throughput (Packet per Second): 24 Mpps
- Concurrent Sessions (TCP): 6 Million
- New Sessions per Second (TCP): 600 Kpps
- Firewall Policies: 4.7 / 3.5 Gbps
- Gateway-to-Gateway IPSec VPN Tunnels: 14 Gbps
- IPS Throughput (Time-Based): 14 Gbps
- IPS Throughput (State-Based): 10 Gbps
- IPS Throughput (Enterprise Mix): 14 Gbps
- SSL-VPN Throughput: 4 / 7.5 Gbps
- SSL Inspection Throughput: 14 Gbps
- Application Control Throughput: 2.5 Gbps
- SSL Inspection Throughput: 14 Gbps
- CAPNAP Throughput: 0 Gbps
- SSL Inspection Throughput (Enterprise Mix): 14 Gbps
- Maximum Number of FortiAPs (Total / Tunnel): 2500 / 6
- Maximum Number of FortiTokens: 3000
- Maximum Number of Registered Endpoints: 3000
- High Availability Configurations: Active-Active, Active-Passive, Clustering

ORDER INFORMATION

Product | SKU | Description
---|---|---
FortiGate 500D | FG-500D | 10x GE RJ45 ports, 8x GE SFP slots, SPU NFP and CP6 hardware accelerated, 120 GB onboard SSD storage.

Optional Accessories

| 1 GE SFP LX Transceiver Module | FG-TRAN-LX | 1 GE SFP LX transceiver module for all systems with SFP and SFP/SFP+ slots.
| 1 GE SFP RJ45 Transceiver Module | FG-TRAN-CG | 1 GE SFP RJ45 transceiver module for all systems with SFP and SFP/SFP+ slots.
| 1 GE SFP SX Transceiver Module | FG-TRAN-SX | 1 GE SFP SX transceiver module for all systems with SFP and SFP/SFP+ slots.

For complete, up-to-date and detailed feature set, please refer to the Administration Handbook and FortiOS Datasheet.

Note: All performance values are “up to” and vary depending on system configuration. IPS performance is based on 1 Mbyte HTTP and Enterprise Traffic Mix. 2. SSL Inspection is measured with IPS enabled and HTTP traffic using TLS v1.2 with AES256-SHA. 3. Application Control performance is measured using 64-Nbytes HTTP traffic. 4. NGFW performance is measured with IPS and Application Control enabled, based on Enterprise Traffic Mix. 5. Threat Protection performance is measured with IPS and Application Control and Malware protection enabled, based on Enterprise Traffic Mix. 6. CAPNAP performance is based on 1444 byte UDP packets.
